

The background image is a faded, high-angle photograph of a school campus. It shows a large, modern school building with a flat roof and large windows. In the foreground, there is a paved courtyard area with several groups of people, likely students, walking or standing. There are some trees and landscaping around the courtyard. The sky is blue with some white clouds. The overall tone is bright and airy.

Facilities Report November
2022

Facilities Report

- Office Security Installation Update – Installation of an improved office security system is currently underway at WHS, WMS, NFES, and CES. This upgrade includes, multiple enable points for lock down, panic, and momentary release controls for evacuations. This work is close to completion. We expect this to be complete by December 1st. We are looking into expanding this project by adding an additional measure of security to our School's offices, with remote buzz in and out exterior door operation, video and voice two-way communications to qualify visitors to the School, before allowing them into our facilities.
- Air Purification Systems Update – Completed the air purification system installation at NFES, WHS and WMS. We will be installing the in-room purification systems at CES and Yale this month. We expect this to be completed by December 1st.
- In September and October, we closed 65 work orders, with 37 in progress.
- Reviewed utility expenses for September/October billing cycle. All utility costs came within historical averages with the exception of Yale Elementary. Yale's electrical usage was up 16% for air conditioning with the new heat pump systems. Yale's net annual heating and cooling expenses should be much lower than what we were spending annually on heating fuel oil.

Future Facilities Projects: 2023

Columbia Elementary Siding Repair

Replacing 50 year old siding

Estimated cost \$31,000

Woodland Middle School Roof replacement

Replacing 30 year old roof

Estimated cost \$417,000 plus tax
